### THE COTTON CROP.

Brazos County's Prospects are Worse Than at This Time Last Year.

The Eagle reporter interviewed some of the leading farmers of Brazos county from different communities today, on the cotton outlook.

The consensus of opinion is that the prospect is poorer than at this time last year and that from four to seven acres will

be required to make a bale. Their opinions follow:

I. M. Cook.

My neighborhood, Steep Hollow and Ho'igan Chapel, will make a bale to four acres. The old cotton is fairly good, but the young crop has almost nothing on it. The prospect may be a little better than at this time last year, but without rain we will not make as much as the two crops of last year.
